

## 8.04 N. Trauma in Pregnancy

*\*<sup>a</sup> Reference 8.04 J. "Spinal Motion Restriction" Guideline*

*During late term of pregnancy (6-9 months), it may be necessary to manually lift the patient's uterus off of the inferior vena cava by maintaining a tilt to the patient's left side. This will help with blood flow to and from the heart.*

*Pregnancy > 20 weeks is a Level III Trauma Center Criteria (at a minimum).*
