

Acute Coronary Syndrome

Designation of Condition: A chief complaint, which has signs and symptoms suggestive of AMI. Patient may present with one or more of the of the following: chest or epigastric pain/discomfort (radiating or non-radiating, discomfort or altered sensations to neck, jaw, either shoulder/arm or into the back. There may be complaints of SOB, weakness, diaphoresis, syncope, nausea and/or vomiting

*****KEY POINT*****

Consider Rust cath lab (M- F/7a- 4p) if the transport time is less than going to a core facility. But, given their limited times, **you must call from on scene (CONTACT ALBUQUERQUE BASE) prior to transport to confirm Rust cath lab availability**
