Colleagues,

This medical advisory corrects errors in the rocuronium clinical formulary. It also removes weight base dosing and creates two standard doses. For Rapid Sequence Induction (RSI), the standard dose is 100mg. For other indications, it is 50mg. It also clarifies the concentration is 10mg/ml and provides ml volumes based on that concentration.

Questions relating specifically to the COGs can be sent to EMScogs@austintexas.gov

Thank you for all that you do,

William J. Leggio, EdD, NRP
Clinical Standards, Practices and Standards Coordinator
Office of the Medical Director
Austin/Travis County EMS System

Mark E. Escott, MD, MPH, FACEP, FAEMS, NRP
