

## National Registry Renewal

### Standard:

To establish a process for System Credentialed Providers to maintain National Registry (NR) at their current level regardless of System Credential level.

### Purpose:

The purpose of this standard is to provide a pathway for System Credentialed providers to maintain their current National Registry certification level independent of System Credential.

### Application:

1. Only credentialed providers in good standing with a registered System Organization may participate in this renewal program
2. The provider must complete all National Registry requirements
3. The provider must complete all OMD-required CE at their current National Registry level
4. The provider must complete all OMD-required yearly skills competencies for their current National Registry level (regardless of System Credential level). ALS skills testing opportunities are currently offered through the Austin/Travis County EMS department. ESDs with ALS capabilities may also skills test internally at the ALS level. ESDs/organizations with Advanced EMT capabilities may skills test internally at the Advanced EMT level. Skills testing sheets may be acquired through the System Education and Professional Development Coordinator.
5. Each organization is responsible for certifying that all national Registry requirements are met for each provider. A signed statement from the organization stating that the provider has met the national Registry requirements should be transmitted to the System Education and Professional Development Coordinator at the Office of the Medical Director and copied to the System Clinical Operations, Practices, and Standards Coordinator.
6. Upon successful completion of the entire process/program, and receipt of the certifying e-mail, the Medical Director, at his discretion, electronically approve the National Registry renewal
7. Providers that are Nationally Registered and System Credentialed at the PL1 or PL2 levels will continue to process applications with their organization's training staff.
