CCT: NEONATAL ARRHYTHMIA

PURPOSE

1. The purpose of this policy is to define the clinical expectations when caring for neonates with new onset suspected arrhythmias.

SCOPE
All Pediatric Neonatal members of the Indiana University Lifeline Critical Care Transport Team.

DEFINITIONS
NONE

PROCEDURES

A. Patients with new onset of abnormal cardiac rhythm during the transport process will be placed on the Zoll monitor (if not currently on one).
B. Once on the Zoll monitor, a rhythm strip is printed and the Control physician should be notified immediately.
C. Patient will remain on the Zoll monitor for the duration of transport.
D. A repeat rhythm strip will be printed prior to Safe handoff if clinically stable.
E. All printed rhythm strips will be uploaded into patient chart.
