

PEDIATRIC FEVER

If oral or rectal temperature is greater than 38° C (100° F):

1. Remove clothing from patient.
2. If no problem other than fever identifiable, no therapy is required at the scene. If child appears toxic, do not delay transport.
3. For fever associated with seizure:
 - I. Administer high flow **O₂** at 8-15 LPM by mask or blow-by.
 - II. If patient is in status epilepticus, treat according to **Pediatric Seizures** protocol.
