

## DOCUMENTATION

---

An EMS incident report (MIR) must be appropriately documented and filed for any call for EMS assistance within Spokane County, regardless of patient transport. This will apply to both basic and advanced life support units and includes public assist calls.

Cooperative charting is essential when more than one agency is documenting the same call. Sharing of pertinent information will help to ensure accuracy and adequacy of the prehospital care record and will help to avoid unnecessary duplication.

Any written hand-off patient documentation from a non-transporting care provider of the patient shall be transported with the patient. The document shall not be edited, altered, or appended to by the transporting agency. Each care provider will document their own patient interaction.
