

Adult Asystole / PEA

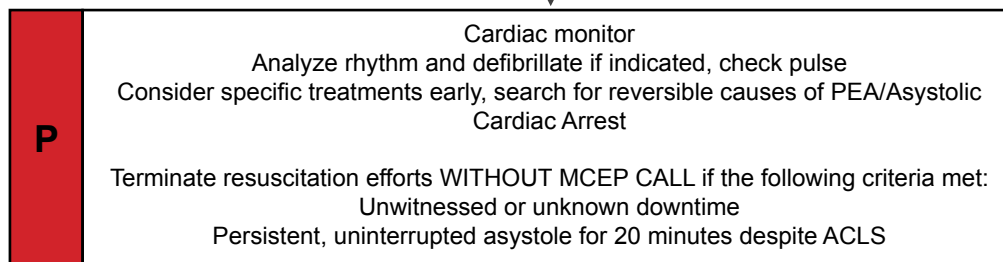

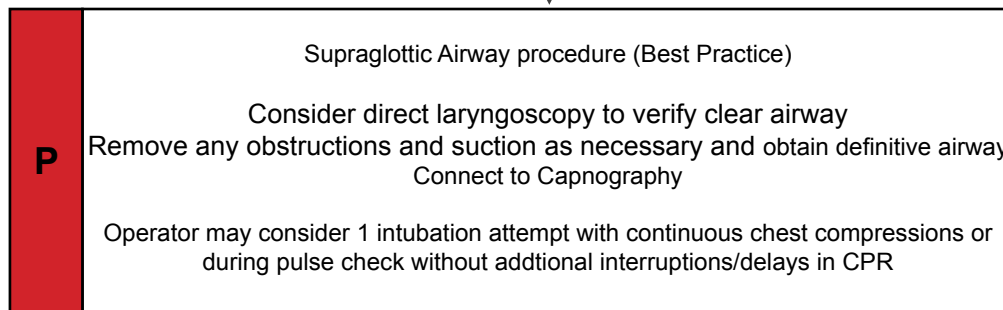

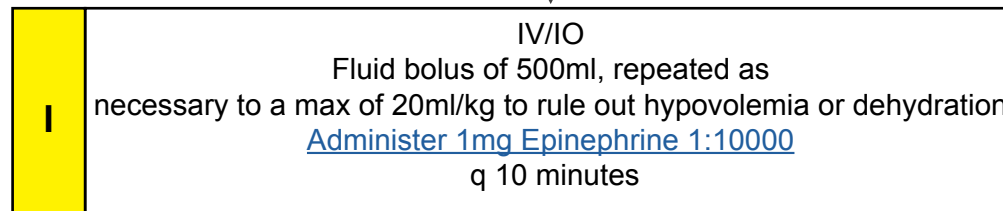

AT ANY TIME

Return of Spontaneous Circulation, go to post-resuscitation guideline

*****NOTE*****

If cardiac arrest suspected to be due to **respiratory arrest**, proceed along appropriate protocol, begin asynchronous ventilations at a rate of 8-10 per minute, and progress immediately to an advanced airway

Reversible Causes

Evaluate H's:

- Hypoxia
- Hypovolemia
- Hypothermia
- Hyper/hypokalemia
- Hydrogen Ions

Evaluate T's:

- Tension pneumothorax
- Tamponade
- Thrombosis (AMI or PE)
- Toxins/Tablets
- Trauma
