

# Medication Cross Check

The provider drawing up the meds will be the provider giving the medication  
EMT-B and EMT-I can verify Paramedic scope medications but CAN NOT administer Paramedic scope medications

- "Contraindications" include: 1) verification of appropriate VS, 2) known patient allergies, and 3) expiration date
- If a discrepancy, disagreement, or need for clarification is encountered at any step in the process, it must be resolved prior to continuing the cross-check
- Essentially only Provider 2 can authorize the administration of the medication
- The MACC must be completed prior to the administration of any medication
- If there is an interruption or change in patient condition of any kind, the process must be re-initiated by Provider 1
- Avoid ambiguous statements or confirmations like "okay"

**A Duty to Avoid Causing UNJUSTIFIABLE Harm**  
**NEVER give the contents of a syringe that is not labeled or without visualizing the vial or ampule from which it was immediately drawn.**
