

# Pediatric Airway

**Designation of Condition:** In terms of advanced airway, pediatric is defined as 12 years old and younger.

\*\*\*KEY POINT\*\*\*

**NOTE: ENDOTRACHEAL INTUBATION IN PATIENTS 12 AND YOUNGER IS NOT ALLOWED**

**If an effective airway is being maintained by BVM with continuous pulse oximetry values of ≥ 90% or stable improving values consistent with clinical condition, it is acceptable to continue with basic airway measures instead of using a supraglottic airway**
