

KCEMS COVID-19 Update March 17th, 2020 1700

PSAP & EMD Screening Process:

No changes from previous update.

PPE Recommendations:

There has been no change, however, messaging below is still considered relevant.

Due to the current climate it is important to have a high index of suspicion. If you are responding to a patient complaining of respiratory problems please ensure that you have the proper PPR with you and conduct your initial assessment from the recommended distance of at least 6 feet away. If you believe that the patient has the potential to be of risk for COVID-19 immediately don your PPE and then continue with your assessment and care of the patient.

By taking these steps you will significantly limit your potential exposure risk.

Droplet Precautions:

There has been no change to current droplet precaution processes as previously reported. N-95's are still required when providing these types of procedures. (NebRx, CPAP, BVM) Please continue to discontinue nebulizer treatments prior to entering in healthcare facilities. Please also continue to contact ED's upon arrival with patients on CPAP to ensure staff is prepared in the assigned location before entering and then transition the patient to an NRB as ordered by the healthcare facility.

Hospital Notifications:

There has been no change from previous updates. Please continue to notify ED's by both EMTrack and MedCom reports for all screened positive patients. Reports should include all signs and symptoms that the patients are experiencing.

Healthcare systems may begin to consolidate positive screened COVID-19 to one lactation. This at the specific direction of the receiving facilities.

Hospital Visitations:

There has been no change from previous update.

Patient Follow-ups:

No changes from previous update.

KCEMS COVID-19 Update March 17th, 2020 1700

Augmented Responses

There has been no change from the previous update. Please refer to system protocol 8.52 Coronavirus Disease (COVID-19) for more information.

Agency Leadership PPE Information:

There has been no change from previous update.

Region 6 has received a shipment of PPE from the SNS. If your Life Support Agency is in need of supplies please follow this link and request the needed supplies.

<https://www.miregion6.org/emergencyequipmentrequestform.html>

Healthcare Systems Updates:

All Health systems

- All health systems have suspended educational clinicals for all education programs.
- All healthcare systems have requested that once patients are dropped off crews do not linger or reenter the room to help prevent exposures.
- EMS may see increased interfacility transfers as this situation that evolves.

Mercy Health

MHSM will have their tent up and running later today. It will be used for low acuity patients only. When EMS calls about a patient that screens positive, the charge nurse will ask for vital signs (including O2 sat) and acuity level (Alpha, Bravo, Charlie, Delta, Echo) and will give EMS direction about where to bring the patient. High acuity patients will be directed to a treatment room. Lower acuity patients will be directed to either the tent or the main ED entrance. No low acuity patients will be directed through the ambulance doors and the treatment areas. EMS will not be responsible to make the determination of where to bring the patient – the charge nurse will direct you.

Spectrum Health

If EMS has a patient on CPAP or is screening COVID positive per the EMS screening tools, please park in the “P-1” parking area at Butterworth. You don’t have to take these patients to Ramp 6.

KCEMS COVID-19 Update March 17th, 2020 1700

Current Statistics:

Kent County Data	
<i>Updated March 17, 2020</i>	
Tests Submitted	102
