

KCEMS COVID-19 Update April 1st, 2020 1700

Emergency COVID Protocols

We are asking that all Life Support Agencies confirm either by email or phone call that your agency received and provided to your staff the following updated emergency protocols:

- 8.52 EMERGENCY System Coronavirus Disease (COVID-19)
- 8.53 EMERGENCY Privileging and Participating Facilities Release
- 10.21 nCOV Resuscitation Final

These have also been uploaded to the protocol app, with a quick protocol update chart in the update file.

EMResource daily reporting for all LSA's

We are starting to receive more information from the State on the Life Support Agencies reporting on their current staffing and PPE supplies. The latest information that was provided by the State yesterday afternoon is that it will only be a weekly report, however, I do not know when the week will start. We would like to have the agencies finish out this week by completing the reporting this Friday through the Google form. Hopefully by the end of the week we will have more information. The direct link to the survey is: <https://forms.gle/mGKF6wqeYPAN42sFA>

In the meantime, you may start to see login information sent to you from the State. Feel free to login and become comfortable with the program and if you have any questions please reach out, but I would suggest not completing any agency updates until we have better direction from the State.

Patient Follow-ups:

We are starting to see quicker turnarounds from the patient testing, therefore, we are able to notify agencies sooner too. This goes without saying to our agency contacts, but always a good reminder that this information is still considered confidential and is being provided for provider safety. Please continue to use the guidance documents approved by either your organization or the CDC for return to work clearance. If there is a specific patient that you would like follow up on everyone is still encouraged to submit a patient follow up request through the regional website or by following this link: <https://www.wmrmcc.org/Submit-a-Report/Request-Clinical-Information>

PPE Push Packs

The Regional Health Coalition is working collaboratively with the local EM's to develop emergency PPE push packs for all Life Support Agencies (transport and non-transport included). These will be available on an emergency case by case basis by contacting either the Healthcare Coalition (transport services) or the Kent County EOC Rep (non-transport services). All regular request should follow the "normal" process.

Process Requesting PPE supplies

Ensuring everyone has the correct link to request supplies

All Fire Departments will continue to request supplies through the Kent County Emergency Management Office by following this link:

https://kentcounty.sjc1.qualtrics.com/jfe/form/SV_5orYU7nBSs3ncrP

All transport agencies and hospitals will continue request supplies through the Region 6 Healthcare Coalition by following this link: <https://www.miregion6.org/emergencyequipmentrequestform.html>.

KCEMS COVID-19 Update April 1st, 2020 1700

Emergency Orders

Yesterday on the weekly State EMS Agency & Provider update the State referenced several requests for Emergency Orders from the Governor's Office. Currently we have not received notification that any orders have been issued. We will continue to look for them and include the information as they are released. The topics that are under consideration for Executive Orders are:

- Suspending CE requirements for recertification and relicensure
- Changing notifications for disciplinary actions
- Changing process for agency inspections
- Changing ambulance staffing requirements

Current Statistics

Kent County Data

Updated April 1, 2020

Tests Submitted	460
Pending Tests	101
